## LITTLE ITEMS OF LOCAL INTEREST

Among the Tennis players taking in the tournament at Drumheller over the week end were: Mrs. Laing, Capt. Painter, Messrs. Birch, A. Braisher, W. A. Braisher, J. M. MacDonald and Joe Connolly.

H. A. Evans, a one-time resident of Carbon, arrived in town on Wednesday from Vancouver.

Mr. and Mrs. C.H. Nash and family spent the week end holidaying at Banff.

Mr. A. Davis and Miss E. Wiertz motored to Calgary on Friday. Miss Wiertz commenced duties on Tuesday in the Holy Cross hospital, where she graduated last June.

Mr. and Mrs. G. Wise, J. Mannelly and Lawrence Poxon spent the week end holiday at Banff and other points.

M. Roberts, of the Bank staff, spent the holiday at his home in Calgary.

Mr. and Mrs. Malton, Mr. and Mrs. G. Peters and Mr. and Mrs. H. Willson motored to Banff and other points to spend the week end holiday.

J.J. Grenier left on Tuesday for Edmonton, where he will take his second year in Arts at the Jesuit College.

Miss B. Davis spent the week end in Calgary.

Dick Gimble left on Tuesday for Calgary.

R. T. Olive was a Calgary visitor to Calgary on Tuesday, bringing out a new Chrysler Coup for Dr. McFarlane.

Work on the hill north of town has been completed and now the road is in good shape and the grade much lower than formerly. All that is needed now is a little gravel and this will be a first class job.

Get your ammunition at Gray's. The hunting season starts one week from to-day.

A dance will be given in the Farmers Exchange Hall on Hallowe'en night, Monday, October 31st, under the auspices of the Carbon and district School Fair. 1tc

Mr. and Mrs. F. Bessant holidayed for a few days at Banff this week.

Yip Kuong left today for Calgary on a month's holiday.

The regular meeting of the Carbon Board of Trade will be held in the Municipal office on Monday evening next at 8 p.m. 1tc

A steady rain Monday and Tuesday nights of this week has played havoc with the farmers in this district and cutting operations had to cease on Tuesday on account of the wet weather. Most of the farmers were just in the middle of their cutting and with another week or so of fine weather would have completed their task. It will now be three or four days before cutting becomes general again.

## WEDDING BELLS ROCHESTER-HOFFORT

A very pretty wedding took place on Saturday morning, Sept. 3rd, at 7.30, in the Catholic church at Rockyford, when Miss Regena Hoffort, of Carbon, became the bride of Mr. Jasper Rochester, also of Carbon. The Rev. Father Kilham of Rockyford tied the nuptial knot. The bride looked charming in a gown of black satin and was attended by Miss Phyllis Hephner, who wore a dress of black crepe de chene. The groom was supported by Mr. Rudolph McKinnon of Carbon. After the ceremony the happy young couple left to spend a few days in Calgary prior to returning to Carbon, where they will make their home in future.

On Tuesday evening Mr. and Mrs. Oliphant entertained in honor of the newly weds and a large number of the young people were present, a jolly time being had by all. Mr. and Mrs. Rochester were the recipients of many beautiful and useful wedding gifts.

## Gamble Items

Mrs. Geo. Johnston, whose funeral was mentioned in last week's "Chronicle" was a highly respected member of our community for many years and a warm supporter of the church. She was known everywhere as the best of women.

Last week end saw the return of some wanderers. Mrs. E. Robinson, who has been on a motor trip to Portland, Seattle, and as far in California as Crater Lake. Mrs. Moorhouse, who motored to Vancouver and returned with her oldest son, Carl, and Daniel Kincaid, who spent the summer with his father and brother in Illinois and Wisconsin.

Mr. and Mrs. Kerr and Mrs. Kerr Sr., of Calgary, spent the week end with Mr. and Mrs. Halstead. Miss Ella Halstead, who is attending Crescent Heights High school, came with them.

Miss Katherine Jones of Calgary visited Miss Mary Hart for a few days last week.

The Three Hills Sunday school orchestra will be with us next Sunday. Our first Sunday School in the new school. School commences there on Monday.

## PARDONABLE ERROR

From a street car strap I dangled as I homeward made my way, and my nerves were snarled and tangled from the labors of the day. Near at hand a youth was sitting; one who seemed a college lad, and my teeth I started gritting, as I do when I get mad.

For a lot of dames were standing on their own and other's feet, and

## STORES TO STAY OPEN EVENINGS

A meeting of the Village Council was held in the office of the secretary on Tuesday night, Sept. 6, councillors McLeod, MacDonald and Garrett being present.

A motion was passed by MacDonald and Garrett that the Village borrow \$1000 from the Board of Utility Commissioners for the purpose of partly paying for the erection of a skating and curling rink in Carbon, the Clubs to pay off the debt as soon as possible.

A petition signed by all but one of the retail merchants, was put before the Council asking that an amendment be made to the Early Closing By-law, whereas the retail stores would remain open between the hours of 7 and 9 o'clock every night, except Sunday, during the months of September and October for the convenience of the farmers during harvest time. The amendment to the by-law was passed.

## SHOOTING SEASON OPENS ON SEPTEMBER 15th

The season for Hungarian partridge will open on September 15, and will continue until December 14, the limits being placed at 15 per day and 75 for the season, according to game regulations. The season will be closed for prairie chicken and ruffed grouse or partridge.

The duck and geese season will open on September 15, and will continue until December 14, with the limit for ducks being 30 a day and 200 in the season and for geese 15 per day.

The open season for rails and coots and Wilson snipes also opens on September 15, with limits of 25 per day, and will close December 14.

the youth refrained from handing anyone his 'comfy' seat. He was really taking chances the way the matters stood, for our grim and angry glances didn't mean him any good.

Women stood around him glaring; mad enough for an attack, and the youth was more than daring for he shot their glances back. Fellow said: "Let's razz this baby!" and I wittingly replied: "He's another student, maybe, who is planning suicide!"

And at last I had to bellow to relieve my anger's heat, and I said: "My fine young fellow, let a lady have your seat!" Then I quickly saw my error, for the "boy" had proved a girl, and I weaved and swayed in terror, and my brain was in a whirl.

Then she started in to snicker, and she said: "You fresh old sheik," and from somewhere in her slicker her powder puff did seek, and the crowd began to titter in a way I didn't like, and for once I proved a quitter and I left the car to hike.

RED ROSE ORANGE PEKOE is extra good.

## Canada To The Fore

Canada is certainly being kept well before the people of the British Isles this year and to a greater or less extent is calling for the attention of the people of the United States. The publicity the Dominion is receiving is of the best and most effective type and can hardly fail to be productive of results highly beneficial to the country.

The elaborate and wonderfully successful celebrations in connection with the Diamond Jubilee of Confederation focussed the attention of the Empire, and large sections of the United States, upon the Dominion and led to a study of its past history and the really marvellous development of the country during the past sixty years. Canada today is better known and appreciated not only by the people of Canada, but by the world. The story of its development and its future possibilities has been told far and wide and in such a way as to command the earnest attention and consideration of people of power and influence.

Following the jubilee celebrations, the visit of H.R.H. the Prince of Wales, Prince George, and Premier Baldwin has again kept Canada prominently before the people of Great Britain. The long of these distinguished visitors, has been followed with the keenest interest by the British press, and it is well within the bounds of probability that a very great stimulus will thus be given to British immigration to Canada.

The ceremonial attendant upon the dedication of the Memorial Chamber in the Peace Tower at Ottawa by the Prince of Wales in their simple but impressive dignity could not fail to impress the British people. So, too, the unveiling of the statue of Sir Wilfrid Laurier who so ably carried on the work of the Fathers of Confederation and who was always a commanding and popular figure in the eyes of Great Britain. Finally, the official inauguration of the Peace Bridge at Niagara attended by the heir to the British crown, the Premier of Great Britain, the Premier of Canada, the Vice-President of the United States, the Governor of New York, the Lieut. Governor of Ontario, and other high officials, provided a friendly meeting ground of the whole English-speaking family and provided an object lesson for all the nations of the world.

The present year has witnessed the placing of a Canadian Minister at Washington and an American Minister at Ottawa; it has revealed the expanding trade of Canada with the world; prosperity and decreased taxation at home; substantial reductions in the National debt; growth and development in all directions. Men of prominence in the life of Great Britain have visited Canada in increasing numbers, and at the present time proprietors of nearly one hundred influential British newspapers are touring the Dominion from coast to coast, seeking for themselves the prevailing prosperity and sizing up the untold possibilities of the future.

It is no idle boast to say that the Twentieth Century is Canada's century. But for the interruption of the Great War and the ensuing depression, and reconstruction rendered necessary to make good war's destruction Canada would now be much farther along the road to the goal set for it when the century opened. It may well be, however, that the very conditions created in the Old World as a result of the war will have such far-reaching results in the movement of population that, in the long run, Canada will from the standpoint of settlement and economic development more than make up for the lost war years.

Certain it is, the war made Canada known to the world as nothing else could have done. Through war Canada found its own soul, realized its own capacity for achievement, developed its productive and financial strength, proved its ability to solve difficult problems and handle great enterprises. Now, in its jubilee year, the Dominion is feeling the impulse of a reawakened National spirit, and is enjoying the fruits of an era of marked expansion in all lines of national endeavor.

The effect is everywhere noticeable throughout the Dominion and the Canadian people are fortunate in that the facts of Canada's growth, development and potential wealth are being investigated by the Old World as never before, and the story told to the millions by their own leaders following personal visits to this country. Canada can realize greatness to the full extent that her citizens are prepared to strive for and by service and effort bring to fruition.

### Motor Casualties Increase

Daily Toll Of Accidents Has Become Appalling

Notwithstanding all the warnings and regulations intended to ensure the safety of those who use the roads, the daily toll of accidents is appalling and the total casualty toll must be something enormous. The majority of these accidents are preventable, and the worst feature about many of them is that it is so often not the victim who are to blame. The fool driver could be excused more readily if he were the only person whose life he endangered, but frequently it is the innocent party who suffers most when the speed fiend is abroad.

### Sprained Ligaments

Gentle massaging with Minard's will quickly relieve the pain and stiffness.

W. N. U. 1695

### Quota Law Is Needed

Immigration From Central Europe To Canada Should Be Limited

Last May 23,000 immigrants were admitted to Canada. Only 8,498 were British born. So nearly two-thirds of the new settlers were of non-British race.

What is going to happen to Canada if our Immigration Department is allowed to continue that policy? With the experience of the United States before us, we seem to be bent on committing national suicide.

The greatest need of Canada is a quota law that will limit the flood of Central Europeans, and encourage the British and Nordic races to come to this Dominion. — The Sentinel, Toronto.

### Open Season For Elks

Open season for elks during which a hunter may take one adult male animal, has been declared in Saskatchewan. Sixteen days, from November 15 to November 30, inclusive, will constitute the first open season which has been allowed since 1918. The step has been taken, according to the game commissioner's report, because of the large increase in the numbers of these animals in the last few years.

### "Pedal Propelling" Boat Refused To Function

Craft Is Useless and Trip Across Atlantic Has Been Abandoned

Confessing that the idea of "pedal propelling" across the Atlantic is a failure, Edward Tierney and Dick Hayman, of Lancashire, are understood to have definitely abandoned the plan to make such a crossing and to be ready to sell their strange craft.

Tierney tested the boat, called the "Carrie," in the harbor and was dismayed to find she refused to function. After repeated attempts he said: "The craft is useless. She has a bad list and leaks badly. The pedal propelling idea is a failure."

"Carrie" is a 12 foot steel boat built like a submarine. She has a beam of three feet and draws two feet of water. She was designed to obtain power mainly through the force of the wind against a small windmill which drives a screw propeller. In calm weather the navigators were to use muscle power to drive the propeller by means of foot or hand pedals. When the plans were made, Tierney and Hayman said they hoped to make the crossing in forty days.

### Use This Liquid To Peel Off Corns

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—see it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from many druggists. Get your bottle today. Refuse a substitute for Putnam's.

### Postpones South Pole Trip

Commander Byrd Decides Details Cannot Be Arranged This Year

After careful consideration of the danger involved in a hasty preparation for his expedition to the South Pole, Commander Richard E. Byrd has announced that the undertaking would be postponed until 1928. Previously, while in Paris, he had expressed the hope that he could make his start this fall.

It was explained that Commander Byrd expected to encounter severe storms and conditions which would make a mishap of any kind almost surely fatal.

### RETAIN YOUR VIGOR

This Can Only be Done by Keeping the Blood Rich and Red

If you would retain your vigor and ambition, keep your blood and nerves in good condition. Anemia, or thin blood lowers the vitality, starves the nerves and causes a general run-down condition. When the blood is thin the skin loses its color, the shoulders droop and weight is lost. The victim of anemia loses appetite, suffers from indigestion, headaches and sleeplessness, and is nervous and exhausted after slight exertion. If you have any of these symptoms do not delay but begin treatment now with Dr. Williams' Pink Pills and you will be gratified with the prompt improvement in your condition. Among the thousands who have found new health through the use of this medicine is Mrs. Herbert Nagle, Ludlow, N.B., who says: "I had not been feeling well for some time and was gradually growing weaker. I would take dizzy spells and often faint. I was subject to severe headaches and found it hard to do my work. I took doctor's medicine for some time, but it did me no good, and I was still growing weaker. In this condition I began the use of Dr. Williams' Pink Pills and in a short time found they were helping me. I continued the use of the pills for a while longer, and found that the trouble that had bothered me was gone and I was once more a well woman."

Get Dr. Williams' Pink Pills at your druggist's or write The Dr. Williams' Medicine Co., Brockville, Ont., and the pills will be sent post paid at 50 cents a box.

### No Change In Style

A young married woman who believed that scientific infant management coincided with her own appearance upon earth called in the doctor to see her baby, suffering from some trivial ailment. He prescribed something simple.

"But that is such an old-fashioned remedy, doctor!" protested the mother.

"Well, madam," replied the doctor "babies are very old-fashioned things."

For Corns and bunions use Minard's Liniment.

### Baby Buzz sounds a "mess" call

FLIT spray clears your home of flies and mosquitoes. It also kills bed bugs, roaches, ants, and their eggs. Fatal to insects but harmless to mankind. Will not stain. Get Flit today.

### Cougars Attack Sheep

Farmer On Cortez Island Had Entire Flock Wiped Out

Sheep owners on the east coast of Vancouver Island and adjacent islands have suffered heavily of late from losses by wild animals, one farmer on Cortez Island having had his entire flock wiped out by cougars. Cecil Smith, of Courtenay, paid a visit to the island and succeeded in killing three cougars, two of the big cats being shot at night by the light of a lamp. Two cougars were also killed by Mr. Smith on the same island a short time previously. There is a provincial bounty of \$10 per head on cougars. In the Nanaimo and Oyster River districts bears are reported to have killed many sheep.

Relief From Asthma, Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when the soft and gentle influence relieves the tightened, choking air tubes? It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

### Death Of Noted Author

James Oliver Curwood Was Author Of Stories Of Canadian North

James Oliver Curwood, author of stories of the Canadian North, and noted conservationist, died at his home at Owosso, Mich., after an illness resulting from streptococcus infection which had confined him to his bed for one week.

Mr. Curwood was credited with being one of the foremost authorities on matters pertaining to the Canadian North West, and every year since he began his career as an author, in 1908, he passed several months in that territory frequently travelling as far north as the Arctic coast. He is said to have been the only American ever employed by the Canadian Government as an exploratory and descriptive writer.

Curwood's love for the outdoors motivated his life and his work as a novelist. He published 24 novels. "The Courage of Captain Plum," his first novel, was written in 1908, after he had spent seven years in newspaper work.

Writing was in Curwood's blood, on his father's side he was descended from Captain Marryat, the novelist. He was born June 12, 1878, the son of James Moran and Abigail (Griffin) Curwood.

### Hotel For Children Only

Berlin claims to have the first hotel for children only. This hotel was erected by the city's juvenile welfare organization in one of the quiet districts of Berlin. It accommodates children sent to recreation places, who have to make a stopover in Berlin. The hotel has room for 350 youngsters.

### Minard's Liniment for scaly scalp.

### Broadway Sometimes Dark

Broadway, New York, is the darkest main street in the United States after two or three o'clock in the morning. After the commercial lights in the electric signs and stores are put out New York's brightest highway is very dimly lit. There are 1,243,538 lamps along the Great White Way.

### Held Breath Fourteen Minutes

College Man At Middleton, Conn., Breaks World's Record

E. L. Gaylor, Jr., of Cliftondale, Mass., a member of the senior class at Wesleyan, has broken the world's record for breath-holding by establishing a time of 14 minutes 2 seconds.

The previous mark was made at the University of California, in 1916, when 10 minutes 20 seconds was recorded.

Gaylor accomplished his feat by breathing excessively a short time before holding his breath, to rid his blood of much of the carbon dioxide. To prepare himself further he concluded the process with three breaths of oxygen, the last of which he held for the record time.

Prof. E. L. Schneider of Wesleyan says the authenticity of the test can not be questioned, as a graphic record of chest and diaphragm motion over the entire period gave convincing evidence that at no time while the test was being made could air have been taken into the lungs.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting that is an indication of their powerful action and not of any nauseating property.

### To Occupy Marlborough House

Prince Of Wales To Change His Residence On Return To England

The Prince of Wales will change his residence from York house to Marlborough house almost immediately on his return from Canada. The work of reconditioning Marlborough house is now being accelerated so as to have the place ready for the Prince as soon as possible.

It is scarcely concealed that his royal highness does not altogether relish changing from his compact quarters at York house, which is within a stone's throw of Marlborough house, but the latter has so many associations with King Edward VII. in his day as heir-apparent that it seems only fitting, now that King Edward's gracious consort, Queen Alexandra, is no more, that this historic residence should be occupied by the present heir to the throne.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

If your boss is not satisfactory, just mention it to him and perhaps he will permit you to resign.

A sensible man doesn't care if he isn't good looking, he knows that there are others.

## Tales of the Town

Wherein are told a few of the Funny things that Happen in this Burg.

"My dear, said Mr. — to his spouse one morning last week. I called little Jack four times this morning and he didn't answer; so I went into his room, turned down the covers and gave him a spanking that I bet he'll remember."

"My heavens!" exclaimed Mrs. —. "Oh dear, how could you? That means that I'll have to find a new maid."

"Why, how's that?"

"How's that? Why, because Jack stayed all night with his chum and the maid slept in the bed all night."

Customer: The horn on this car is broken.

Sam: No it's not. It's just in different.

Customer: What do you mean?

Sam: It just doesn't give a hoot.

Husband: I'm in the dark about this bill.

Wife: We'll both be if Scotty comes to town; it's the electric light bill.

Children: An old gentleman asked us whose children we were.

Mother (proudly): How nice of him!

Children: Then he went and told Constable Purdy.

Mother: Now Dorothy, do you know what becomes of bad little girls?

Dot: Yes'm, they have dates every night when they grow up.

He: My idea of a wife is one who can make good bread.

She: My idea of a husband is one who can raise the dough in the hour of knead.

Jack says every time a friend of his sends his girl a telegram he puts it down in his expense book as "chicken wire."

Sunday School Teacher: Does anyone know why Moses' mother hid him in the bull rushes? All right, Betty, you may tell us.

Betty: I 'spect it was 'cause his mamma wanted to go to a bridge party.

## The Forgotten Island of Romance

1—The Settlement at Tristan da Cunha. 2—The only access to the sea. 3—Canadian Pacific Empress of France. 4—The island's means of transportation.

Interest on both sides of the Atlantic has recently been aroused by the curious solitude of their Majesties King George and Queen Mary of England for the welfare and comfort of the least known and loneliest island colony in the world.

Romance blows with the wind from every solitary island; and the romance of Tristan da Cunha is its grandeur of isolation, the struggle for existence of the few inhabitants of its rock-bound shores and the experiences of a sailor who left as a heritage to the island the belief that somewhere amid the rocks is to be found a wealth of pirate treasure. The island is distant from its nearest neighbor, St. Helena—1500 miles and is far from the path of ships, rarely indeed receiving a visit from the great and busy world beyond the horizon; a world which, marching along the highway of progress, has all but forgotten this outpost of civilization in the desert of the South Atlantic Ocean.

In 1814, during the war with Great Britain, an English garrison occupied this strategic island. There they found three Americans one of whom, Jonathan Lambert, "of Salem, a citizen and mariner thereof," is reputed to have sailed the seas as a buccaner. As a pirate he ran untrue to form somehow escaping the yard arm and public hangings that have been their traditional fate. The story goes that he came to Tristan in order to hoard, in a secret place, the booty of many a rich prize, seized and

plundered on the roaring Spanish Main.

Thus the place is invested with the magic spell of a Treasure Island, and, to this day, the islanders believe that within its bounds is to be found a rich hoard of doubloons, moldores, pieces of eight or louis d'or. Whether this be true or not, Lambert, when found by the English, was engaged in the peaceful occupation of preparing the skins and oil of seals, with which the shores abounded. These were exchanged for provisions with any passing ships; and the trade appears to have been so lucrative, that Lambert was encouraged to issue a proclamation, inviting all the world to trade with the island. Of it Lambert declared himself the sovereign lord, "grounding" as he is claimed to have said, "my right and claim on the rational and sure ground of absolute occupancy."

The continuous occupation of Tristan da Cunha began, however, in 1817 when, on the withdrawal of the garrison, William Glass, of Kelso, a corporal in the Royal Artillery, was, at his own request left on the island with his wife and two soldiers who had been induced to join them. The real discoverer of the island was a Portuguese navigator whose name the island bears. This was in the year 1506.

From the tiny settlement founded by Glass, which was increased from time to time by shipwrecked mariners and a few settlers from Cape Town, and diminished again by the exodus

of the more restless ones among them, the present colony of 140 souls has sprung.

The people are self-governing and self-supporting. The men are daring sea-men and clever carpenters and masons; but there is a touch of the primitive about the picturesque bullock-carts, and the cottages built of huge blocks of stone.

Physically the island is entirely of volcanic formation. High cliffs circle the lonely spot and are pierced with ravines, the walls rising like ramparts from the sea, to a height in many places of over 1000 feet high. They are topped by a central cone that stands out amid the surrounding cliffs at a height of 7640 feet, snow-capped and symmetrical as the Peak of Teneriffe. Here, in the largest crater, is a fresh-water lake, which, it is said, is never frozen. On the northwest of the island is the sole access to the sea—a narrow plateau where is the only settlement.

The social life of the community is limited and the monotonous existence of the inhabitants has resulted in some of the colony drifting off beyond the horizon on some chance merchantman. The island, however, will soon experience the joys of radio for early in 1928 the Canadian Pacific liner Empress of France on its first African-American cruise will stop near this island enroute to Cape Town, where a powerful set and many other gifts from American and Canadian passengers will be handed by a raft, for use and comfort of the islanders.

## WORLD HAPPENINGS BRIEFLY TOLD

London now has a telephone connection with Stockholm, Sweden.

J. Ogden Armour, head of the great packing industry beating his name, died in London following a six weeks' illness with typhoid fever. He would have been 61 years old in November.

Great Britain and Yugoslavia have signed a debt-lending agreement whereby the Yugoslavian war debt of \$127,500,000 will be paid in 62 annuities beginning this year.

The eightieth birthday of President Hindenburg is to be commemorated by the issue of stamps sold at slightly higher rates than the face value, and the profits to be devoted to charities.

Only about 5,000 people are participating in the rush to the new diamond field at Wolofund, Transvaal, compared with 25,000 in the recent rush to Graspan, according to the Daily Mail's Johannesburg correspondent.

A remarkable yield in fall wheat is reported from Markham Township, Ontario, on the farm of Deputy Reeve R. L. St. Ives, who has recently finished threshing 600 bushels of wheat of the Dawson Golden Chaff variety, from less than 12 acres of land.

Sixteen deaths from pneumonia are reported to have occurred during an epidemic on the British steamer Sudeb, carrying 800 immigrants from Trinidad to Canada, an Exchange Telegraph despatch from Capetown says.

The name Lemby has been approved for a chain of islands in the entrance to Cumberland Sound, Baffin Island, Franklin district, Northwest Territories. The islands have been named after the Hon. Rodolph Lemby, the Speaker of the House of Commons, Canada.

Pacha (Peggy) Hall, Santa Ana aviator, has confirmed reports that she was negotiating with J. P. Shay, of New York, said to represent a New York newspaper, for financial backing for a transatlantic flight in which she would be the first woman to pilot a plane in the ocean hop.

Surveys of a road route between Prince George and the boundary of Alberta, have been ordered by the public works department in the belief that this highway, as well as a road up the North Thompson river, will be needed at some time to accommodate growing travel.

## How Icebergs Are Destroyed

Melted Of Using Thermite Is Found Highly Successful

An iceberg of almost indescribable beauty, 500 feet long, with a hollow in the centre 90 feet in depth, having sides of porcelain white and containing an emerald green lake 4 feet deep, was encountered by a recent iceberg denuding party.

Armed with ropes, ice picks, axes, drills, and canisters containing thermite, they were trying a highly successful method of destroying icebergs that endanger the trade routes of the North Atlantic.

On landing, the party drilled holes into the ice and inserted the chemical charge, which is fired by fuses. Thermite develops tremendous heat at a great rate, reaching as high as 5,000 degrees Fahrenheit. In a few hours the largest iceberg cracks and disintegrates with a noise resembling an earthquake.

## MORTON'S FALL and WINTER CATALOGUE

is now ready. Have you received your copy? If not we will mail one free of charge on request. This issue contains the latest Fall and Winter styles in Ladies' Coats, Dresses, Hats, Underwear, Hosiery, Gloves, Men's Clothing and Furnishings, Trousers, Linens, Blankets and Towels, Sheets and Beddings. Send a post card now for our free catalogue.

## Tribute To Mr. Baldwin

Is a Patriot In the Best Sense Of the Word

A very prominent name, not of Mr. Baldwin's political faith, remarked last year that the Prime Minister of Great Britain never stood out so great a figure as in the closing days of the General Strike, and that his greatness of character notably revealed itself by his magnanimous appeal when the fight was won. His words regarding the working men of his country in his recent address to the Ottawa Canadian Club again disclosed the big-hearted, sane, and generous man, patriot in the best sense of that hard-worked word.

A shrewd and successful man of business, nobody knows better than Mr. Baldwin the fallacies lying behind the doctrines preached by the militant minority of the Labor party. He has on a previous occasion pointed out the uneconomic character of the practice of restricting output and placing the unskilled and easy-going workman on a parity with the skilled and active. The deserved and high tribute he paid to British workers as a whole, his appreciation of their difficulties, and his faith in their integrity of purpose make us understand once more how, in the perplexities and bitter strife which accompany profoundly changed conditions in the national life, England, almost alone amongst European nations, has not crumbled, and is able to tread the bloody road of revolution—Ottawa Journal.

## Storms Make Atlantic Passage Formidable

Competent Ocean Weather Bureau and Suitable Plans Will Overcome Trouble

It is not distance but storms that make the Atlantic passage formidable. It will cease to be so when ships, heavier or lighter than air, are built specially for such a service, and a competent ocean weather bureau is established. Navigating skill in the air will consist largely in avoiding storms. Great Britain is completing a dirigible that will be used for voyages between England and Canada in 1928. A sister ship is to furnish a service to India and Australia. The presumption is that the sea will be crossed in a comparatively few years by multimotored airplanes carrying express matter and passengers.

Many a shrewd man has purchased a gold brick in the form of experience.

## The Line To Fort Churchill

No Engineering Difficulties Will Be Encountered In Laying Out New Road Bed

It is expected that the railway to Fort Churchill will be completed towards the close of 1929, said C. S. Gzowski, chief engineer of the construction department of the Canadian National Railways, who has been charged by the Dominion Government with the rehabilitation and further extension of the Hudson Bay railway.

Mr. Gzowski said: "At Churchill there will be no difficulty in establishing railroad terminals for any reasonable capacity required at a relatively small cost, the line being generally flat for a considerable width, giving a wide choice of location. The 150 miles of railroad construction to complete the line is generally very similar to the present R. B. railway. Soundings indicate that muskeg depth and conditions of frost are the same as previously experienced."

"The summer of 1928 will be employed clearing and grading the route ready for track laying, bridging and ballasting in 1929. No bridge of consequence will be encountered. The proximity to various streams and rivers assures proper drainage to the roadbed."

The reason why a chicken crosses the street has been discovered. It is the same reason as that which makes a driver try to beat the train to the crossing.

## SUNDAY SCHOOL LESSON

AUGUST 28

**NATHAN LEADS DAVID TO REPENTANCE**

Golden Text: "A broken and a contrite heart, O God, Thou wilt not despise."—Psalm 51:17.

Lesson: 2 Samuel 11:1 to 12:25.  
Devotional Reading: Psalm 103:8-14.

### Explanations and Comments

**I. Nathan's Parable, verses 1-4.**—Several months have passed since David ordered the murder of Uriah and took to himself the latter's wife; now the prophet Nathan has come, and in a graphic way, by means of a parable, he brings home to David the enormity of his sin.

There were two men in one city; one of them was rich, having exceedingly many flocks and herds; the other little ewe lamb. Nathan adds one detail after another about that lamb so as to arouse the listener's sympathy for the poor man and abhorrence of the rich man's deed. He had bought and nourished it; it grew up together with him and with his children; it did out of his own morsel, and drank of his own cup, and lay in his bosom, and was unto him as a daughter. There came a traveller to the rich man. "The traveller was, as Bishop Patrick explains it from the Jewish writings, the evil imagination, disposition, or desire, which came into David's heart." For this wayfaring man's food the rich man served the poor man's lamb, sparing his own flock and herd. Matthew King.

The rich man represented David, but David knew it not.

As the Philadelphia Record observes, if the people who are blind to their own faults only realized it, what a business the oculists would do!

**II. David Passes Judgment On the Deed, verses 5, 6.**—David supposes Nathan has brought a case to him for judgment. His anger is greatly kindled against the rich man, and this is his decision in the matter; the rich man deserves death; he who had no pity and did so foul a deed shall restore four lambs for the one (see Exodus 22:1).

"The first thing that strikes is the blindness and infatuation of the man to have missed the application of the parable. It seems an almost impossible state of self-deception which could let him flare out an indignant virtue against the supposed culprit, and never once dream that the case could apply to himself. But it is not such an impossible thing as it looks; nay, it is even one of the commonest facts of morals, and one which we can easily illustrate any day among ourselves. We nod assent to a general statement of right and wrong, even give an unhesitant judgment on concrete cases that are mentioned; and yet never make the personal application."—Hugh Black.

About the only sure way to keep a secret is not to have a secret.

## A Real Menace

Motorists Who Demand Right To Speed Have Spoiled Driving For Pleasure

Today there is a great demand for high-powered cars. Speed seems to be the most essential thing demanded by the motorist.

The Department of Highways recognized this early in the year, and in answer to public demand on the part of motorists raised the speed limit on country roads from twenty-five to thirty-five miles an hour. But motorists are not satisfied with the new limit. They are purchasing cars capable of much greater speed, and they are demanding the right to use the power stored up in their motors.

This is an indication of the present age—the speed age—and there are those who look for an increased legal speed limit in the years to come. Each year cars are travelling faster on the highways, and with this increased speed the dangers and perils of motor traffic are becoming immensely greater.

There are some motorists who are gradually giving up the pleasures of a country drive, and who are even refusing to drive their cars in the cities as a result of this tendency on the part of the general public to go faster and faster.—Chatham News.

**Winnipeg Newspaper Union Fashion**

An Attractive New Frock

This charming one-piece frock is quite simply fashioned and is an exceedingly smart style. The tie collar and jabots are graceful adornments and may be lined with contrasting material or the edges bound. The long sleeves are gathered to narrow wrist-bands, and the belt fastens with a buckle in front. No. 1625 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3½ yards 39-inch, or 2½ yards 64-inch material and 1 yard 39-inch contrasting material if the collar and jabots are lined. Price 29 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

**Canadian National Rys**  
Good for FIRST CLASS PASSAGE BETWEEN ALL STATIONS VALID FOR ALL TIME  
NOT TRANSFERABLE Form 501.  
Special issue to commemorate the opening of New Union Station at TORONTO, Ontario CANADA August 6, 1927

## First Ticket Out Is Issued To The Prince of Wales, Good For All Time

The first locomotive to haul a train into the new Union Station at Toronto, on the occasion of the opening of this station by H.R.H. the Prince of Wales, on Saturday, August 6th, was one of the 6100 Northern Type locomotives recently placed in service by the Canadian National Railways for handling their fast passenger and manifest trains. These locomotives, which are the largest in the British Empire, and of which 40 have been ordered for use on Canadian lines, are distinctively a product of Canada. With tender, their over-all weight is 326 tons; length 24 feet and they are capable of developing more than 3200 horse power. It was this

"Titan of the Steel Rail" which hauled the royal train from Kingston to Toronto.

On this occasion also, the first rail way ticket issued from the ticket booths of the new station was one entitling His Royal Highness to passage "Between All Stations" on the Canadian National System. Immediately after declaring the new station open, the Prince of Wales proceeded to the Canadian National Railways ticket window where he was issued "Ticket No. 1" of the issue of the new station. Tickets numbers two, three and four, were issued to Prince George, Premier Baldwin and Mrs. Baldwin, respectively.

Of the 61 Northern Type locomotives, such as used to haul the Royal train for this occasion, twenty are being built at Kingston and a like number at Montreal. These are distinctly the last word in locomotive construction in the British Empire. They are to be used on "The International Limited" and other famous passenger trains of the National System, and on the former train they will inaugurate the longest locomotive run in the Dominion—from Montreal to Sarnia, 511 miles without change. These locomotives are also convertible and may be used either in fast passenger or fast freight service.

## TENSE SITUATION IN CHINA OVER AVIATION POLICY

Shanghai. In the midst of an increasing chaos in both the military and political situations in the Yangtze Valley, an incident arising out of the forced landing of a British military aeroplane on Chinese territory has developed a tense situation between the Chinese authorities and the British Expeditionary Force here.

Although the particular spot where the plane landed was held by Chinese soldiers and was the Kiangwan golf course, this land, nevertheless lies outside the international settlement of Shanghai. The Chinese authorities have repeatedly protested against British airmen flying over any and all Chinese territory, whether used by foreigners who play golf or by Chinese generals for manoeuvring.

Dr. C. C. Wu, Minister of Foreign Affairs for the Nanking Nationalist Government, announced that the Chinese intend to use the incident for a show-down in the matter of flights over Chinese territory.

"The British in the eyes of the Chinese and international law are criminals as regards their aviation policy in China," Dr. Wu said, adding that although the Chinese had not the force to meet British "imperialism" they intended to let the world know what the British were doing.

The aeroplane incident has resulted in British demands for the return of the wings of the plane, the only parts of the machine that a Royal Air Force detachment had not carried off to safety before Chinese troops arrived.

When the Chinese refused to restore the wings, Major-General John Durnan, the British commander ordered the railway between Shanghai, Hangchow and Ningpo to be cut south of Soochow Creek and British troops were posted at strategic points around the city, thus re-occupying the posts held by them during the troubles several months ago which followed the capture of Shanghai by the Nationalists.

## Poultrymen Visit Edmonton

Trip Through West Proving Enjoyable and Educational

Edmonton. Representing 18 different countries, 129 delegates from the World Poultry Congress, recently held at Ottawa, arrived at Edmonton, all mostly tired from long train journeys and anticipating a good rest in the city during the day.

Hon. J. S. Martin, Minister of Agriculture for Ontario, is one of the Poultry Congress tourist visitors who had not been before in Edmonton. He was a caller at the Parliament Buildings during the morning and compared notes for a short time with his Alberta running mate, Hon. George Hardley.

A story of good crops all across Canada is told by the Ontario minister, in his own province, the fruit yield is only fair, but grain and other crops are excellent, with a particularly noticeable increase in the acreage under tobacco, he said.

Mr. Martin was greatly struck with the appearance of the wheat fields along the railway between Saskatoon and Edmonton and liked the summer following that he saw there and elsewhere in the West. The whole trip through the West is proving both enjoyable and educational, so says, not only to the members of the touring party who come from other countries but to Canadians, like himself, who are accompanying them.

## Noted Artist Dead

London. — Richard Caton Woodville, English artist, known for his battle paintings, was found shot in his studio and died on the way to the hospital. He was born in London, January 7, 1856, and was educated in Germany. He exhibited his first picture in the Royal Academy in 1879, since which he has been represented annually. He painted several large pictures in Windsor Castle for the Queen. He also wrote articles on sport and travel.

W. N. U. 1685

## Harvest Help Arriving

Large Quota From Eastern Canada and British Columbia

Winnipeg, Man. — The great tide of harvesters will soon be flowing over the prairies. Arrangements have been completed for the handling of the thousands who will come from Eastern Canada, according to officials of the Canadian National Railways, and there will be no delay in getting them to the points where they are most needed. British Columbia, which will send 6,000 this year has already begun its movement, 200 being on the way now from Vancouver and fifty from Victoria, and others will follow closely on their heels.

Eastern Canada will contribute 25,000 men to the harvest this year, it is estimated. Manitoba needs 9,000, and can get 6,000 locally; Saskatchewan asks for 10,000 of which half are available locally, and Alberta needs 18,000 of which 8,000 must come from outside the province. British Columbia has 6,000 available.

## Alberta Coal For East

Outlook More Favorable For Shipments To Ontario This Fall

Toronto. Following a conference here between Mayor Foster, Property Commissioner Chisholm of Toronto and Howard Sturteburt, trade commissioner of Alberta, the outlook becomes more optimistic for shipment to Toronto and Ontario generally of Alberta coal.

"As the railway commission is now considering the question of using rates on Alberta coal for shipment to eastern points we have every hope that we are going to get a rate this year," said Mr. Sturteburt, "and there is going to be a free movement of coal from Alberta to Ontario. The railway board, I expect, will make its findings before the end of the month and the Government will have to take action after that. We feel pretty certain that the finding will be satisfactory. I am basing that statement on the evidence submitted."

## Wins Pacific Air Race

Art. Goebel, Hollywood Stunt Flyer, Takes First Prize

Wheeler Field, Honolulu. — Making a perfect landing at Wheeler Field, United States army aviation field 25 miles from Honolulu, the monoplane Woodcock, piloted by Art Goebel, Hollywood, Calif., stunt flyer, landed here to win first prize of \$25,000 in the Isle air derby from Oakland, Cal., the first of his kind ever held.

Nearly two hours later Martin Jensen, only Honolulu entrant, piloting the monoplane Aloha, descended amid the thousands of spectators at the field, winner of the \$10,000 offered for second prize.

## Entitled To Equal Favors

Canadians In U.S. Should Receive Advantages Offered To British Emigrants

Moncton, N.B. — "The movement which is afoot to bring British emigrants to Canada must not be accepted by us unless the same advantages which it is proposed to give those newcomers be also given to our own citizens now living in the United States and who are desirous of returning to their country of origin," was one of the outstanding statements made by the Hon. P. J. Veniot, at a public gathering which closed the first day's proceedings of the ninth French-Canadian congress held in this city.

## Greetings Were Delayed

St. Paul, Minn. — Christmas greetings for 1926 are being received by about 200 friends of Mr. and Mrs. A. B. Jackson. Jackson found the bundle of unmailed cards under the seat of his automobile recently and dropped them in a mail box. He had carried them in the car since last December.

## Bear Wrecks Sedan

Ashford, Wash. — A picnic party in Rainier National Park returned to their parked car after a short hike and found a large bear clambering onto the top. The top of the sedan gave way under the animal's weight and let it down into the tonneau, where it smashed its way to freedom. All of the car except the chassis was demolished.

## HOW JOHN JINKS SAVED LIFE OF COSGRAVE GOVT.

Dublin. John Jinks, who made his name a household one in Ireland by walking out of the Dail and saving the life of the Cosgrave Government by failing to record his vote, was neither kidnapped nor spirited away.

"I simply walked out of the Dail. I was neither kidnapped nor spirited away," Jinks said this evening. "For the sake of the stability of my constituents I thought it was better to retain the present Government."

Jinks thought the result of the division, which was in favor of the Cosgrave Government only by the narrow margin of one vote cast by the Speaker to break a tie, was a good thing for Ireland.

His action in failing to vote as his colleagues of the National League (Republicans) did—against the Government—was likely to result in his expulsion from his party.

The first suggestion that Mr. Jinks might have been kidnapped was contained in a despatch to The Evening Star from its Dublin correspondent, who said that Jinks supported the resolution to vote against the Government adopted at a party caucus recently, was in his place in the Dail. "He came an hour before the vote was taken, but then disappeared. Captain William Redmond, leader of the National League Party, was quoted in the despatch as expressing the opinion that Jinks' failure to vote with his colleagues must have resulted from his being spirited away, unless he had been overcome by a sudden illness."

## Used Flashlight When Lighting Pant Failed

New York Doctor Forced To Perform Operation Under Difficulties

New York. — Mrs. Violet Moore, of Jersey City, is recovering from an operation for appendicitis performed by the light of an electric flashlight in a hospital during an electric storm.

The doctor had just administered the anaesthetic when a bolt of lightning extinguished every electric light in the hospital. Dr. Mettart, the surgeon, called for some sort of light and Miss Mary Reed, hospital superintendent, found a flashlight. For an hour and ten minutes the surgeon worked under its rays until the operation was completed. Mrs. Moore was taken from the operating room just as the electric light flashed on again.

## Dances to the Wind

"Moving to Melody" of wind in the pines and thundering waters that tumble down the Giant's Steps in Paradise Valley. The beautiful dancer is Miss Mona France and the stage with its rugged setting is to be found not far from the Chateau Lake Louise in the Canadian Rockies where Miss France has been holidaying.

## Trade Treaty Signed

France and Germany Come To Agreement On Tariff

Paris. — France and Germany have placed their signatures on a commercial treaty, based largely on most favored nation tariffs, after three years of frequently interrupted negotiations.

It is a complex arrangement of several thousand clauses, effective September 6. By the treaty France will get better terms on agricultural products, textiles, shoes, machinery, tools or articles, and porcelain, while Germany will benefit on chemicals, machinery, electrical goods, cement and leather work. Most favored nation treatment will be applied for both sides by December 15, 1928, at the latest.

France won the long contested right to export a limited amount of wines to Germany on favorable terms.

## Editors Touring Canada

British Party Will Cover Dominion From Coast To Coast

Montreal. British newspaper owners and editors to the number of 30, members of the party which is touring Canada, arrived in Montreal from Quebec after completing a tour of the Maritimes and before returning to the Old Land will cover Canada from coast to coast.

"When we get back to Europe again, Canada's story will be told throughout the length and breadth of Great Britain," said John Sidney King, president of the British News paper Society. "After such a journey as this we can never again rest bringing in the name of Canada at every opportunity. Before we left, Canada to many of us, was just a patch of red on the map of the world. Now we are seeing its amazing proportions and developments for ourselves."

## Turk Monument At Gallipoli

Turkish Government To Erect Memorial To Countrymen Who Perished In War

Gallipoli, Turkey. — The Turkish government is to erect a memorial on the heights of Gallipoli to the 100,000 Turks who perished in the Great War campaign there.

According to a member of the Construction Committee it will be of such proportions "that it will make existing monuments erected by the Allies seem no more than insignificant bits of stone."

It will be 122 feet high and \$36,000 already has been appropriated by the Ministry of Defence for its construction.

## BRITISH PREMIER TO PAY VISIT TO CANADA AGAIN

Halifax. "We have loved every minute of our time. We enjoyed, of course, because we have worked hard," Premier Baldwin told the citizens of Halifax in his parting address. "I have given every minute of time I could spare to Canada, and when I am through with the duties of my present post I will come again," he added.

The addresses of welcome by the province and by the city were said Mr. Baldwin, "steeped in the history of this continent and couched in language to warm the heart of an Englishman." The Prime Minister took exception to two words in addresses: Nova Scotia had called his visit a holiday and Halifax called it recreation. He felt as though he might have to go back to England to work in order to get a little rest.

On the chain of office worn by the mayor was the date 1719.

"I can almost remember that far back," said Mr. Baldwin. "As it is, I do remember that those were as gloomy and as depressing years as Great Britain ever passed through. And through those years this city stood as a sentinel. It was the one spot where the flag was never lowered and it is the spot where it will never be lowered so long as the flag flies anywhere. It was here that the Royalists came to take shelter — that magnificent stock, tried in every fire, which became the parents of this part of Canada, gave the very best to the life of the people of today."

"I read with great interest the report of the commission under the chairmanship of Sir Andrew Ross Duncanson," the Premier continued. "I trust the results of that report may be to increase the prosperity of these provinces."

## Estate Worth Thirty Million

Brothers and Sisters Of Arthur Walker Receive Large Share

New York. The will of Arthur T. Walker, heir to the fortune of Edward P. Scripps, Methuen, Mass., 100 years old, leaves the bulk of his \$30,000,000 estate to his four sisters and two brothers. The will, which was filed in Brooklyn, also provided a \$200,000 bequest to Walker's secretary, F. E. Ruel. Mr. Walker, who was a native of Chatham, Ont., was buried in that city last Saturday.

Walker's secretary was bequeathed \$75,000 in the original will dated Feb. 14, 1923, but in a codicil dated June 26, 1925, the amount was increased to \$200,000.

The secretary was named sole executor without bond. There were numerous bequests ranging from \$3,000 to \$25,000 to friends.

## Norwegian Emigrants Coming To Canada

Quota For U.S. Is Limited and Dominion Benefits

St. Paul, Minn. — Canada is getting the emigrants of Norway, Christian Anderson, an employee of the University of Minnesota, agricultural school here, stated on his return from a visit to his native land.

"Under the immigration law of the United States, the Norwegian quota is only a fraction of the number that would like to come here," Anderson said.

"Canada has been quick to see the point," he said, "and has agents in Norway."

## For Protection Of Air Pilots

London. — Piracy on the high seas and highway robbery are now things of the past, and air pirates are the danger of today. To meet this new menace, the pilots of bulion carrying aircraft of the British Imperial Airways Limited are being armed with revolvers.

## Forest Fires In Buffalo Reserve

Edmonton. — Fire rangers have been ordered to the Buffalo reserve near Fort Smith where a fierce forest fire is said to be blazing. Two herds of wood and plains buffalo maintained there by the Dominion Government face a lean winter if the acres of wild hay are destroyed.

# Would Banish All Wars By Interesting The Public In The Cause Of Internationalism

"Internationalism through education" was the theme of an eloquent address to the second biennial conference of the World Federation of Education Associations at the University of Toronto, by Raphael Herman, of Hollywood, Cal. Mr. Herman has devoted years of his life and a large portion of his fortune to the cause of internationalism.

After expressing his diffidence as a layman before professionals, Mr. Herman congratulated the federation on having selected Canada as its meeting place. The 2,000 mile length of unprotected frontier between Canada and the United States spoke volumes for the actual possibility of neighboring nations continuing to live at peace with each other, he said.

"May I be permitted to state at the outset that I am neither militarist nor pacifist," opened the speaker.

"I am an 'internationalist,' that is, one who loves his own country with devotion, but is convinced that patriotism does not lie only in a willing ness to die for one's country, but also to live for it. As such, I come to plead the cause of world peace through education, the only practical means of solving the problems which face humanity. I come to plead to you, educators of the coming generation, by whom alone this can be brought about in whose hands lie the peace and the destinies of the human race.

"The modern conception of internationalism is not based on the extinction of national individuality. It is founded on the principle of the creation and the preservation of harmony in the midst of difference, such as is achieved in a mosaic, where one piece may contrast with, but fits into and contributes to the beauty of the whole intricate pattern. Nationalism and internationalism are complementary. Each is necessary to the other for the complete life, and each should amount to a passion and as such be accepted as a normal manifestation of human nature.

"Political thinkers, philosophers and economists have recognized the principle that for the solution of many of its own problems one nation depends on others. The complex of all nations includes an intense desire for the development of national individuality and all that it implies in the direction of cultural and political ideas. This is a fundamental, biological and psychological fact. It forces recognition of the corollary—that unless nations in their dealings with each other are guided by some sense of internationalism such as I have defined, they will fall short of their own ideals and in the attainment of the highest form of existence possible.

"It is urged that training for war is easy because it is according to nature, whereas training for peace is impossible because it is contrary to nature. We need point but to the United States and Canada. If the pacifist spirit is possible here, it should be possible elsewhere and with its appearance elsewhere the world's problems would, in a large measure, soon be solved.

"It was absolutely essential that the young should be taught history accurately and without bias," Mr. Herman declared.

"Youth should be impressed with the idea that truth must not be made subservient to a desire to enforce a personal viewpoint.

"History should tell the great advantages of peace over war. Peace and not war, peace with its great beneficial love is the great and only achievement worth the while, which will lead to thoughts of friendliness and goodwill and things which make for the genuine progress and happiness of the world.

"History should not be taught to little children because things must be brought down to absurdity in order to make it understandable to them."

Mr. Herman supported his contentions by quotations from Premier Stanley Baldwin, Premier Briand, Foreign Minister Stresemann, and other statesmen.

"We have many colleges and excellent textbooks on military sci-

ence," continued the speaker. "Pupils in school are taught to worship war and its heroes, like Caesar, Napoleon and Moltke; and we are taught to admire deeds which we could condemn indignantly if done in the ordinary walk of life.

"But we do not have a single school for peace. Just think of it; not a single association that could be called the pioneer of a great peace empire in which we could discuss the mutual comprehension and clarify subject that become distorted and confused in the turbid atmosphere of the street. We must therefore begin with the spiritual and intellectual aspects of peace and have schools of peace like those of war, which will lead directly towards the goal which is not less than the establishment of the Kingdom of God on earth.

## An Absent-Minded Shopper

Woman in London Store Walks Through Plate Glass Window

A woman shopper absent-mindedly walked through a plate glass window at Folkestone recently.

The woman had made a purchase at a drapery shop and was preparing to leave. At the time the back of one of the large windows was open, ready for dressing.

The customer unconsciously walked up the step leading into the window and then across the empty window floor right into the plate glass measuring 11 by 12 feet.

The window was shattered, but the customer escaped uninjured.

When asked for an explanation she said she must have been thinking of something else.

1618  
A Chic New Frock

Exceedingly smart is this frock of youthful charm, having groups of plaits in the front of the skirt and a plain back. The bodice has tucks at each shoulder, a shaped collar, long sleeves gathered to wristbands, or short sleeves with cuffs, and a trim belt. No. 1618 is in sizes 16, 18 and 20 years. ## New Coal Product

Cheaper Than Oil Says Agent Of English Firm

H. A. Bradstreet, of London, who arrived in New York recently on the Berengaria, represents the Sensible Heat Corporation of England, which is the owner of a newly patented reducing process for coal that leaves a residue which, when pulverized, can be used, he said, in ships and locomotives.

"The whole secret of this unlocking of the products of coal is very simple," said Mr. Bradstreet. "The coal is put into a big retort similar to a cement kiln, and while the retort rotates the hot, inert gases make the coal yield up the volatiles from which the products are obtained. The residue is left, and it, when pulverized, can be handled with safety.

"We gave a demonstration on July 12 for the British Institute of Naval Architects at Cambridge University, at which representatives of the United States Shipping Board were present. As a result of that demonstration I am in New York.

"Oil is too expensive as a fuel, as large shipping companies in England and America have learned. They are now turning to pulverized coal that will flow as easily as oil, and will give the same steaming radius at from one-fifth to one-sixth the cost."

## Poultry Congress Great Success

Exceeded the Most sanguine Expectations Of Promoters

The Third World's Poultry Congress which was held in Ottawa from July 27 to August 4 was a greater success in every way than its most sanguine promoters expected. Forty-two countries sent delegates and the live birds on exhibition totalled nearly 10,000. There were birds from the poultry farms of King George V. of Britain, the Prince of Wales, and from the farms of other reigning monarchs in Europe. The United States and Canada had very large and attractive exhibits which indicated the progress that poultry raising has made in North America. Several thousand delegates and visitors from the United States attended the Congress and took an active part in the sessions of the Congress. On August 3, H.R.H. the Prince of Wales, his brother Prince George, His Excellency Viscount Willingdon, Governor-General of Canada; Rt. Hon. Stanley Baldwin, Prime Minister of Britain, and Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, visited the Congress exhibits.

# Increasing Attention Paid By Authorities To Protection Of The Health Of The Public

## Do Hens Need Open Runs

Confined in Pens Or Allowed To Run In the Open, Advantages Are About Equal

For five years an experiment has been under way at the Agassiz Experimental Farm to find out whether or not laying hens do better confined in pens or allowed their freedom in the open. The report of the station for last year giving the results of this experiment and also deals with live stock, field crops, gardening, and other experiments, is available at the Publications Branch of the Department of Agriculture, Ottawa. Barred Plymouth Rocks comprising ten pullets in each pen have been used from year to year. The results for the five years show that the advantages are not great either way. The birds confined to their pens gave an egg yield of 189 per bird, while those on range laid on an average of six eggs less. The value of the eggs was practically the same, being \$1.72 per bird for the confined lot, and \$1.58 for those on range. There was but one cent per bird difference in the cost of feeding, which amounted to \$2.77 for the confined birds, and \$2.76 for the others. The grain fed consisted of equal parts by weight of wheat, oats, and ground corn, with a mash consisting by weight of 100 pounds each of bran, shorts, corn meal, and crushed oats, and 75 pounds of beef scrap and two per cent. of charcoal.

## Easterners Should See West

"It's a pity more Eastern Canadian travellers do not travel through the West. They have no idea of the marvellous scenic beauty, or of western progress," in the opinion of Lady Roddick, Montreal, who has been on a seven weeks' tour of the west and Alaska—her first trip west of the Great Lakes. Marvelling at the mountains, she was yet most enthusiastic over the prairies, and the size of prairie towns she found astonishing.

## Will Raise Sheep

The Earl of Minto has recently been selling off his pure-bred cattle in order to devote his attention to sheep raising. There are already 1,500 sheep on his Alberta ranch and more will be added from time to time.

One of the most essential duties of a government is the proper protection of the health of its people. This thought became so forcible in its demand for action that a Department of Health was formed at Ottawa in 1919, its primary factors being derived from other departmental branches concerned with health matters.

Since its inception the scope of the department has gradually increased, and now in Canada's Jubilee year, we find strong, concentrated effort working for the welfare of Canadians through the medium of the Health Department.

The Quarantine Service of a country stands for protection against the introduction and spread of contagious diseases. In this connection there are in operation five large completely organized quarantine stations. Every port of entry through its custom officer acts as a sub-station.

A medical inspection of immigrants is carried on at all ports of arrival and immigrants mentally and physically unfit are prohibited from entry.

Previous to the inauguration of a world-wide plan for the care of sailors who are sick or injured while on board ship, it was the practice of many vessels to land sailors at the next port and sail away, leaving them in charge on the community. To overcome this difficulty a tax is now imposed, according to tonnage, on all ships arriving at Maritime ports, and the Canadian Government assumes the care of all sick and injured sailors arriving at ports of entry.

The suppression and control of the narcotic drug traffic has a world-wide significance, and Canada, through this department is well to the front in the work accomplished. Approximately 253 pounds of opium, 250 ounces of morphine and heroin and 127 ounces of cocaine were seized in Canada during the past year. No less than 368 aliens were deported from Canada after conviction for various offences under the Act.

The problem of patent medicines has for many years been a difficult one in all countries where efforts were made to systematize and control these products. Within the last few years the number of these preparations on the market under license in Canada has been reduced from approximately 50,000 to 5,500 and all preparations for which exaggerated claims are made, or those of foolish or harmful composition have been excluded.

Splendid work is being accomplished in the Child Welfare department. It is concentrating its effort on the problem of maternal mortality. Shortly, the importance of this question will be brought before the physicians and the Canadian public. Publications dealing with this subject and with Child Welfare have been issued by the department.

The adulteration of food has been a prolific source of fraud for centuries. The food and drugs laboratory of the department examines thousands of samples of food products every year in its endeavor to give the consumer exact weight or measure, and a bona fide product, as printed on the label.

Owing to the fact that the traffic on the Great Lakes and other inland waters of Canada has increased with the population, the waters of the lakes became correspondingly polluted and unsafe for human consumption. This is particularly true in the harbours and at the shore line. All vessels are now inspected and must carry pure water for the use of the passengers and crew.

## Report Is Denied

Officials of the Canadian Government Merchant Marine denied the report that the C.G.M. would establish a regular steamship service between Vancouver and the West Coast of Mexico and South America. It was understood at the local office that plans were under way for such a service, but it will not be operated by the merchant marine.

Friend: Why did you send that dish back if there was nothing wrong with it?

Scotsman: Well, mon, if ye gie the impression that ye're no satisfied wi' the service the waiter'll no expect such a big tip.

## Prince and Baldwin at Ease

This study of His Royal Highness the Prince of Wales and Premier Baldwin of Great Britain, was taken on the deck of the Canadian Pacific liner Empress of Australia as she steamed towards the King's Wharf at Quebec where a thunderous welcome awaited the distinguished visitors.

The Prince and the Premier had found a sunny spot at one end of the deck and were enjoying their first good glimpse of the Ancient Capital. Contrasting to the peacefulness of this scene the great guns from the Citadel boomed their welcome while thousands of people cheered incessantly from the gaily bedecked docks and shore line.

## CUTICURA

Helps Business Girls to Look Their Best

The regular use of Cuticura Soap, assisted by touches of Cuticura Ointment when required, keeps the complexion fresh and free from blemishes, the hair live and glossy, and the hands soft and smooth. Cuticura Talcum is fragrant and refreshing, an ideal toilet powder.

Sample Each Free by Mail. Address Canadian Depot: "Gibbons, Ltd. Montreal." Price, Soap 25c, Ointment 25c and Talcum 25c.

## PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

## CHAPTER VI.—Continued

"No, no, dear Mrs. St. John, I never tell. See, I say my words." She held up her hand solemnly. "Cherish health; seek truth; know God; serve others. Now, you see! I swear!"

Greatly wondering and distressed, Helmi went swiftly on her way. The address led her to the north end of the city, where, leaving the car line, she went down a narrow old street where second-hand stores spilled their ruffled wares all over the street. Dirt and dust, wounds and scratches were so thick on everything, Helmi shuddered with the thought that all the owners were dead and didn't care. Would her dear lovely lady's beautiful chairs and window hangings ever come to this?

The number Helmi sought was on a building that had been painted recently. The name was on the door in gold and red—foreign looking letters, with many sharp points.

Inside people were eating at narrow tables covered with white oil-cloth, and all the waiters were Chinese. To one of them she went and asked for Sam. She was too distressed to be frightened.

"I upstairs," he said, "outside."

An outside door opened on a flight of dull gray, greasy stairs, which creaked and groaned as Helmi swiftly ascended them. She found herself in a dark passage at the top of the stairs, where dismal curtains of dingy brown obscured the rooms beyond. Fear held her then, and for a moment she stood irresolute.

"Sam," she called, "Oh, Sam!"

A face like a yellow pumpkin peered through the curtains at her.

"Whatchawan?" it breathed.

Helmi held out the five-dollar bill. "For a lady," she said, "she is very sick."

Sam nodded. He pulled a curtain back, with a rattling of rings, and said, "Wait here!"

Helmi entered a room whose air sickened her. It was so strangely cold and dead, a sort of embalmed air which would never yield to sun-

shine. And although it was a very still room, everything she looked at seemed to writhe with a secret motion. A huge black glittering jar stood on the table in front of her, and coiled around it was a red snake with its head lifted ready to strike! Helmi would have sprung back but it held her with its cruel shining eyes, and although she knew its tongue would dart out like a red hot needle she could neither move nor scream! Then she saw it was not a real snake at all, and that there were many of them in the room. They writhed around the great bowls that stood on a shelf above her head, and gave her the unpleasant feeling that they might unwind any minute and come down. A bowl of goldfish made the only friendly spot in the room as they darted and turned and dove, catching a little gleam of light from the sky-light over head, but even they looked pale and dying as if their water had never been changed. Panels of embroidery were on the wall—crimson and gold and blue—stiff with peacocks and serpents and strange birds that she had never seen. One of the panels was of pale blue satin, on which stood out blood-red flowers. Helmi touched them wonderingly, and then looked at her finger-tips.

The old man came in with a little box, which he handed to her gravely. His ghastly yellow hands had claw-like nails that seemed to twist around her hand as she took it.

"You nice little girl—you come see pretty things—old Sam show you—maybe."

Helmi stared without comprehending, at his toothless gums and ghastly hands. "I'm in a hurry," she said, as she started for the door.

Just at that moment the outside door opened quietly and stealthy steps came up the stairs, one, two, three—then the stairs swarmed.

When Helmi reached the hall she found herself held by a tall burly policeman. The Shanghai Chop Suey House, long suspected by the police, was undergoing a raid.

## CHAPTER VII.

The newspapers the next morning carried startling headlines:—

"Sensational raid on a down-town opium den! Young white girl found in possession of the drug! refuses to reveal identity! Appears to understand no English! Spent the night in police cells."

The neighbors all were very sorry for Miss Moore when it became known it was her Helmi—the girl to whom she had been so kind that was found in the Chinese den. They were sorry, too, for Mrs. St. John, who really felt very badly over it. "And fancy the deceit of the girl telling Miss Moore she was going for a lesson! she had been so good to the girl, too—really, it is too bad; but what can one expect from these foreigners with their standards so low?"

This was from the lady next door.

The minister and his sister called, the sister almost hysterical. "My dear!" cried the latter opening the door without knocking, as one would do if the house were on fire, "you might all have been murdered in your beds with an addict in the house! It is just another instance of God's protecting care. And to think you never knew she had the habit!"

Miss Moore sat down and leaned heavily on her broom. "I never saw a girl who loved work like Helmi," she said. "Surely a bad girl would not love work like that. But she deceived me—I cannot get over that. She made me think she was getting lessons from Mrs. St. John, and when I missed her that night and wondered

about her, for she was always in in time to get tea, I phoned Mrs. St. John, who was sick in bed and hadn't seen Helmi at all. Then I asked Mrs. St. John about it, and I got it out of her that Helmi hadn't been coming for quite a while. That has been a terrible blow to me. Now, where was she when we thought she was over there?"

The minister's brows were contracted and his eyes narrowed. "I am going to see Helmi," he said suddenly.

His sister was about to remonstrate, but the thin-lipped expression of his face froze even her voluble speech. Edward was so obstinate sometimes, she told Mrs. Moore when he went out.

He went across the road and rang the bell. "Yes, Mrs. St. John is at home, but she can't see anyone, she is very much upset over the Finnish girl." The maid's eyes were red.

"What do you think?" he asked her.

"She helped me every day, and sang Finn songs, and was so happy—she couldn't be a bad girl, Sir."

The maid evidently believed there was a relationship between happiness and goodness. Here again was evidence of Helmi's love of work.

"Tell Mrs. St. John I called," he gave her his neatly engraved card.

Reverend Edward Terry.

Young Methodist Church.

"I hope you can get her off, Sir, she's only seventeen," said the maid anxiously.

"I hope so, too. I believe she is an innocent girl."

Mr. Terry sought the Police Court, but found that he could not see the prisoner, no one could see her until after the case was heard. From the matron he found out that Helmi was the only person arrested in the raid, and the most serious aspect of the case now was that she had resisted arrest and knocked Inspector Watt down the stairs.

The minister went to the magistrate's office to see if he could not obtain permission to see Helmi. After all, he was her minister.

Magistrate Windsor, a gray-haired, florid-faced old man, sat behind an oak desk and glared at his visitor from under bushy eyebrows. The minister had sent in his card.

"Well, Sir," said His Worship, testily, "What can I do for you? Sit down while you wait."

Mr. Terry took the round-backed, well worn chair, vaguely conscious of the many anxious supplicants who had interviewed this fery looking old official. "I am interested in the case of this young Finnish girl who is here under arrest," he said; "she attended my church."

The magistrate's face grew redder; his eyebrows bristled. "She's a young wildcat, that girl," he said. "One of our inspectors is laid up with a broken arm. I am afraid your ministerial efforts were not very successful in her case, Parson!"

(To Be Continued.)

Stop the Cough. — Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eucalyptic Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

## New Postage Stamp Issue

Further Denominations of Canadian Historical Stamps Now Available

Three further denominations of Canadian historical postage stamps have been issued. On the new five-cent stamp appears the head of D'Arcy McGee. It is colored purple. The twelve-cent stamp, colored light green, bears the heads of Sir John Macdonald and Sir Wilfrid Laurier.

The new twenty-cent stamp which is carmine in color, has the heads of Baldwin and Lafontaine.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Expeller to give relief. Its effects are sure and lasting.

## Plenty Of Cars

San Francisco's entire population could go riding at once if an average of a little less than six persons were carried in each of the city's registered motor vehicles. San Francisco has a motor vehicle registration of one car to every 5.7 persons.

Minard's Liniment for cuts and bruises.

## World's Smallest Books

Twenty-Nine Minute Masterpieces Exhibited At London Library

What is probably the world's smallest book was to be seen in London recently. It contains over forty blank pages bound between embossed leather covers. Four of its size would not cover a penny, yet every detail is perfect and clearly visible without the aid of a lens. This miracle of the bookbinder's art was one of twenty-nine such marvels exhibited at the London Library; the entire collection could have been contained in an ordinary cigar box.

Among these minute masterpieces was a copy of "Galileo" measuring half inch by a quarter inch, which is claimed to be the smallest Italian book set from movable type. More wonderful still was a handwritten copy of the Koran found some time ago in Dardad. Written in Indian ink on faded paper, this book is octagonal in shape, with one of its eight sides forming the back where the leaves are joined. This curious manuscript is perfectly legible despite the fact that a half-crown would cover it.

A Bible measuring one and a half inches square, and a volume of Dante half inch smaller, seemed giants in this illipudian library. A New Testament about one-fifth of a square inch in area that was kept, like some precious jewel, in a handsome plush case, was so clearly printed that one could read the title and headings without difficulty. Another Bible, in red leather covers less than one inch square, was fitted with a tiny magnifying glass through which one could admire the delicate work of the type and illustrations. —Tit Bits.

## Not Made In Canada

Patriotic Buttons To Commemorate Confederation Ordered From United States

A Sunday School of the United Church was very loyal to Canada.

It had a celebration in honor of the 60th Anniversary of Confederation, and presented a patriotic button to each scholar. The button was emblematic of the Anniversary, and inside, it named the giver, that is the United Church.

But—There was a microscopic lettering — and it read, "Made in U.S.A."

Are there not button manufacturers in Canada?

Could not these buttons have been "Made in Canada?"

Can we imagine a button made for "Independence Day" across the line bearing in small type the legend, "Made in Canada?"

## Joined In Welcome

In referring to the visit of the Princes and Premier Baldwin to Canada, the New York Times said editorially: "America joins cordially in welcoming these Royal and distinguished guests as they touch her borders. If they had come one hundred and fifty years ago they might have disavowed us from independence by their reasonableness, their common sense and charm."

## New Egg Record

A Barred Plymouth Rock, owned by the University of Saskatchewan, has established a new record for the three Prairie Provinces, laying her 300th egg in her pullet year of which there is still a month to go. The world's record for trap-nested production is held by No. 6, an Agassiz, B.C. pullet, which laid 351 eggs in 365 days.

## Sold Tree Chair For \$4,000

John Krubsack, bent the twig and a comfortable chair sprang out of the ground. By grafting and bending the limbs of 32 box elder saplings Krubsack trained the trees to grow into the form of a chair. It took 11 years of patient effort, but Krubsack sold the "tree chair" for \$4,000.

The most obstinate corns fail to resist Holloway's Corn Remover. Try it.

## Biscuit Factory For Calgary

Addressing the Calgary Board of Trade, Harvey Shaw, president of the Independent Biscuit Co. Ltd., stated that the Calgary plant would be in operation in September and would have a payroll running from \$150,000 to \$200,000 a year.

## Minard's Liniment for burns.

It's sometimes as difficult to be right as it is to prove the other fellow wrong.

## A Man of Rare

## Professional Attainment

The originator of Dr. Pierce's Golden Medical Discovery was the late Dr. V. Pierce, M.D. At first he practised medicine in Western Pennsylvania and his unusual ability and success were soon recognized there, then he moved to Buffalo, N. Y., and established the World's Dispensary where his famous home remedies have ever since been made.

Each succeeding year the sale of Dr. Pierce's Golden Medical Discovery has been greatly increased. Evidently people appreciate the fact that it increases the appetite, stimulates the digestion, helps to enrich the blood, clears the skin of eruptions and blemishes, and makes both men and women feel as they did when they were young. It contains no harmful ingredients.

Ask your nearest druggist for Doctor Pierce's Golden Medical Discovery, in tablet or liquid form, or send 10 cents for a trial package of tablets to Dr. Pierce's branch Laboratory in Bridgeburg, Ont.

## Little Helps For This Week

"Be ye kind one to another," Ephesians IV, 32.

A kindly act is a kernel sown. That will grow to a goodly tree. Shedding its fruit when time has flown.

Down the gulf of eternity, — John Boyle O'Reilly.

All worldly joys go loss To the one joy of doing kindnesses. — George Herbert.

## MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies "eat everything that grown up people do." Such a course is almost certain to bring on indigestion and lay the foundation of much ill health for the little one.

Other mothers administer harsh, nauseating purgatives which irritate the stomach and bowels and at the same time cause the children to dread all medicine.

Absolutely no meat should be given to a child until it reaches the age of 18 months, and then only if approved by the doctor. For medicine, all strong, disagreeable oils and powders should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the new-born babe. They quickly banish constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A drug called santalin, which has the strange effect of making a person see yellow, has been discovered by a Scottish scientist.

## Mothers Should Use

## When The Babies Are Cutting Teeth

During the baby's teething time, in the hot summer months, the bowels become loose and diarrhoea, dysentery, colic, cramps and other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes away in shadow, and very often the termination is fatal.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

It has been on the market for the past 80 years; put up only by The T. M. M. Co., Limited, Toronto, Ont.

## SICK ABED EIGHT MONTHS

After Taking Lydia E. Pinkham's Vegetable Compound Could Do All Her Work and Gained in Weight

Melfort, Saskatchewan. — "I had inward troubles, headaches and severe pains in my back and sides. I was so sick generally that I could not sit up and I was in bed most of the time for eight months. An aunt came to visit and help me as I was unable to attend to my baby and could not do my work. She told me to try Lydia E. Pinkham's Vegetable Compound, and after taking two bottles I could get up and dress myself. I also took Lydia E. Pinkham's Blood Medicine. When I first took the medicine I only weighed seventy-eight pounds. Now I weigh twice as much. If I get out of sorts or weary and can't sleep I always take another bottle of the Vegetable Compound. I find it wonderfully good for female troubles, and have recommended it to my neighbors. I will be only too glad to answer any letters I receive asking about it." — Mrs. WILLIAM RITCHIE, Box 486, Melfort, Saskatchewan.

ED. J. ROULEAU,  
Editor and Publisher

Scots in Canada are looking for-  
ward with keen interest to the  
coming Highland Gathering and  
Festival of Scottish music to be held  
at Banff September 3 to 5, the ac-  
tivities taking place on the grounds  
adjoining the Banff Springs Hotel.  
Through the generosity of the Cana-  
dian Pacific Railway officials this  
festival has been made possible and  
is along the line of the Canadian  
Folk Song Festival held at the  
Chateau Frontenac, Quebec, in May  
which was voted such an outstand-  
ing success.

The United States' interest in the  
development of the locomotive in  
Canada is seen in a request by the  
Baltimore and Ohio Railway to the  
Canadian Pacific Railway to send  
one of its latest passenger types of  
engine to the centenary exhibit of  
locomotives, which will open at  
Baltimore on September 24th. The  
Canadian Pacific has arranged to  
supply one of its latest types of the  
"2300" class locomotives, complete  
with crew, for the occasion. This  
is the company's fastest and most  
powerful passenger locomotive.

One of the strangest attempts at  
taking a census is now being made  
by Andrew Widsden of Bella Coola,  
B.C., according to information re-  
ceived here. At the request of  
Harlan I. Smith of the National  
Museum of Canada, Mr. Widsden is  
taking a census of the grizzly bear  
population of some eleven valleys  
along the fiords which are included  
in the "Norway of America" tra-  
versed on the steamship journey  
between Prince Rupert and Van-  
couver. The coast line between  
these two ports is a noted big game  
hunting spot and attracts many  
grizzly hunters each year from all  
sections of the continent as well as  
from other parts of the world.
